Boys/Men

Girls/Women

Is it ok for a stranger to touch us on our private areas?

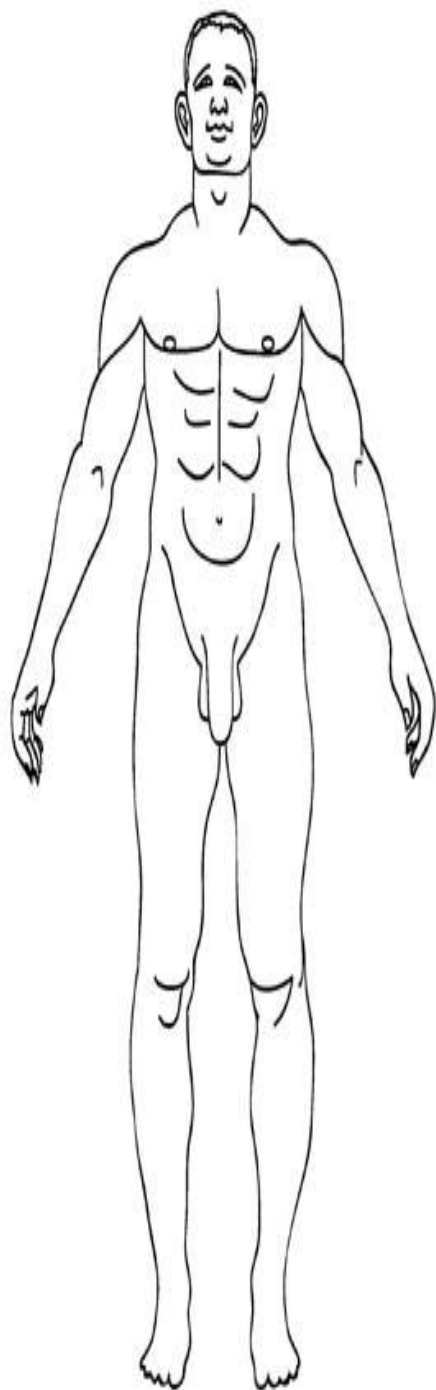

Who may need to touch us on our private areas and that is ok?

If we are worried about someone touching us in our private areas, who do we talk to?

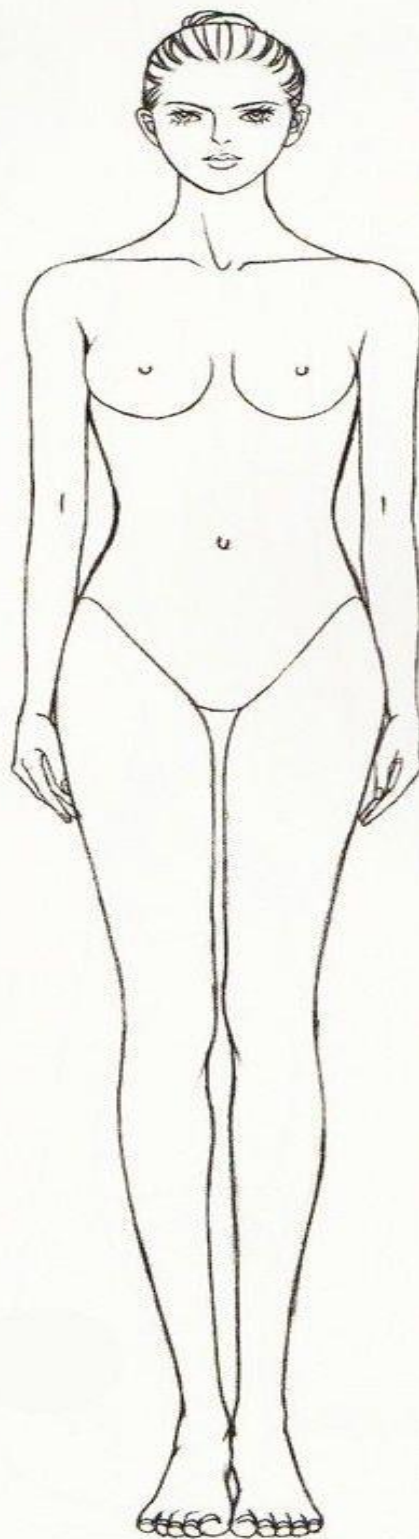

How are men and women physically different from each other?

In the boxes below label the differences in their bodies.

Men

Women

KEY WORDS: Penis, Vagina, Breasts, Ovums, Scrotum, Testicles,

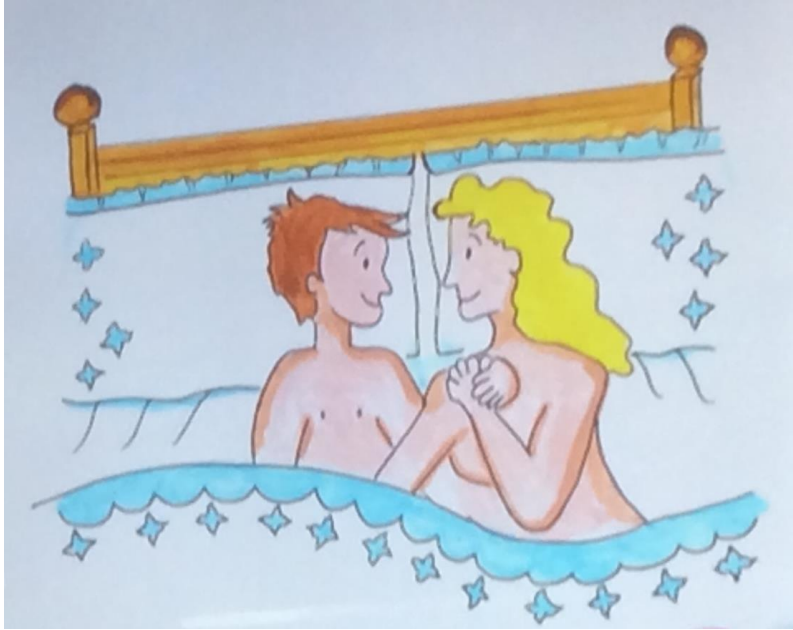

Man, woman, boy or girl...
We are unique...
We accept ourselves and each other.

Let us pray...

For the wonder of me,
Thank you Lord.
For the uniqueness of us all,
We thank you Lord.
For the wonder of your love in creating us,
We thank you Lord.

Amen

Relationships

Natural Birth

Puberty, Penises and Periods

Puberty is when we change from a child to a young person.

Where does hair grow during puberty?

During puberty, we start to sweat more which can make us smell. What must we remember to do daily?

Mads, Sads or Glads

Some of the changes we can't see. These are called feelings or emotions.

How can we support people during puberty? How can people support us during puberty?

Changes made during Puberty

Label the changes that happen to boys and girls during puberty.

Boy – Man

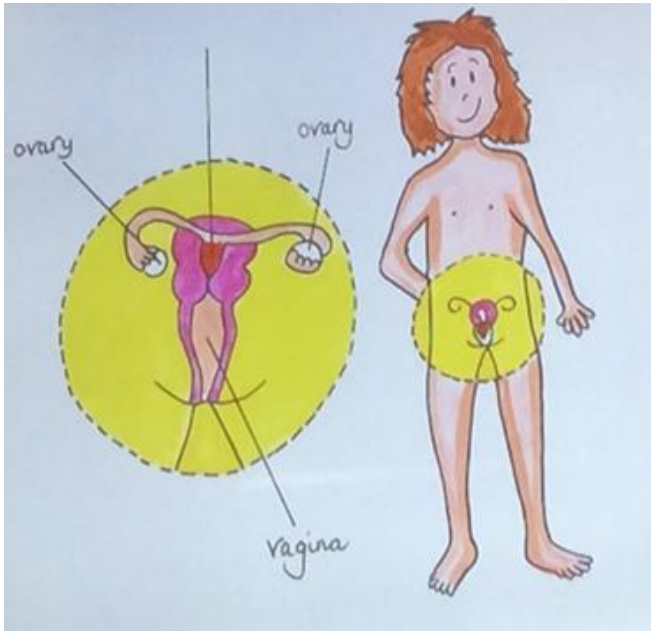

Girl - Women

KEY WORDS –

Muscles, Breasts, Penis, Testicles, Genitals, Hips, Wet dreams, Periods

Puberty changes just for girls

A girl's period will start at varying ages. Usually between the age of 12 and 14 years old. However some girls will start as early as 8 years old or as late as 16 years old.

What is the scientific word for a girl's period?

How often does a period occur?

Why does a period occur?

Girls usually use pads to soak up the blood during a period. It is nothing to worry about, usually it is only 2-4 teaspoons of blood each month,

Don't forget every adult you know has been through puberty, so if you are worried, ask a Parent or Carer, or there is always someone in school you can talk to/

Remember who your trusted adults are.
